

Our Environment and OHS Policies;

GURBUZ CONSTRUCTION takes full account of its responsibility to insure safety and protect environment during all its business processes. This awareness leads us to set and take relative measures in order to prevent environmental damages, occupational accidents and diseases that may occur during our operations.

Gurbuz Construction complies fully with the applicable national and international legal requirements and obligations related to the environmental safety and work safety. We prioritize a proactive preventative approach to manage risks related to environmental safety and occupational health and safety and we aim to continuously improve our performance in this subject. We clearly communicate our goals and performance on OHS and environmental safety to all our stakeholders such as our clients and suppliers. We are aware that the success and sustainability of our environmental, occupational health and safety policies is a collective responsibility that needs to be adopted by all our employees, suppliers and subcontractors and we make sure they follow the relative rules and procedures. We also ensure the contribution of our employees to the decision making process of our occupational health and safety management policies.

Our Principles

OCCUPATIONAL HEALTH of our employees, our sub contractor's employees, our visitors and our neighbors is of vital importance at Gurbuz Construction

OCCUPATIONAL SAFETY is our license for work. We refuse to work in an environment where the work safety is not provided.

ENVIRONMENT; We consider ourselves as the committed guards of our natural resources. We aim to leave a clean environment to the next generations and we lead our business accordingly.

We are aware that to strictly follow our OHSE system and to fulfill all engagements deriving from our policy is the key to achieve perfection in OHSE.

UMUT GURBUZ
Managing Director
